

All the Way Home

by JD Cordlé (copyright September 18, 2019)

Verse 1:

Ghostly footsteps in the hall
Familiar faces I don't recall
The lights are on but nobody's home
I recognized the anger there in the tone

Chorus:

And life has left me all alone
To figure out all the rest on my own
And life has left me all alone
But I'll still love you all the way home

Verse 2:

Look at the sand there in the hourglass
Funny how it all goes by so fast
They tell me the only thing that stays the same is change
But I know damn sure it didn't last

Chorus:

And life has left me all alone
To figure out all the rest on my own
And life has left me all alone
But I'll still love you all the way home

Verse 3:

I got the sunlight here in my eyes
I've been listening to, too many of his damn fool lies
and I got you here in my heart
It's time to tear it all down, make a new start.

Chorus:

And life has left me all alone
To figure out all the rest on my own
And life has left me all alone
But I'll still love you all the way home
